Please answer the following questions:

Describe any exceptional physical characteristics or conditions pertaining to the property which may affect the intended use or development, which do not generally apply to other properties in the same zoning district.

NONE

Describe how the strict applications of the provisions of the zoning regulations would result in practical difficulties or unnecessary hardship.

Our family would not have the extra storage area we need to house our larger belongings or have covered shelter for our two dogs from the winter weather elements. Right now we only have a small area for our dogs, they need a larger area to stay while we describe how the granting of the variance will not result in material damage or prejudice to other properties in the vicinity nor be detrimental to the public health, safety or welfare.

We would paint and roof the cold storage area to match the rest of our existing home. It will look like one solid structure and not like an add-on.

Describe how the granting of the variance will not be contrary to the objectives of the comprehensive plan.
