

NRCS dike completed project photos - 11/3/17

- Item #1 - the 4 spur dikes (indicated by arrows) constructed this past summer.
- Item #2 - the diversion channel that was created this past summer.
- Item #3 - additional excavation & channelization to obtain more gravel for the NRCS dike.
- Item #4 - the NRCS dike.

A low angle oblique photo of the 2,200 foot long NRSC dike looking northwest across the Glacier Stream.

A view of the backside of the dike looking towards the southeast with the Glacier Stream in the background.

A low angle view of the dikes constructed to protect Copper Ave and the radio antenna the past two summers.

The NRCS dike as seen from above the beach looking upstream.
