To whom it may concern,

I am interested in becoming a member of The Valdez Museum & Historical Archive Association, INC for many reasons. I find the history of the state of Alaska to be absolutely fascinating beyond measure, from the purchase to state hood to providing economic wealth that made the United States the pre-eminent super power. The history of this state is interwoven with the city of Valdez in an unmatched parallel. The history of the great gold rush, the copper and mineral mines that were found by way of Valdez and the oil terminal today. The education of local residents, state residents, tourists and passers by is paramount in that history being passed down, carried on, and built upon is a need and a service I would be proud and ecstatic to be involved in. Please consider me when voting for a new board member.
